*Based on over a decade in working with clients to develop integrated mobile software and solutions, Allegro has developed the Allegro Field Services Suite of mobile applications specifically tailored to the evolving needs of tomorrow's field service teams. As part of the Field Services Suite, the Health Care Modules have been designed to address the specific needs of remote health care professionals.*
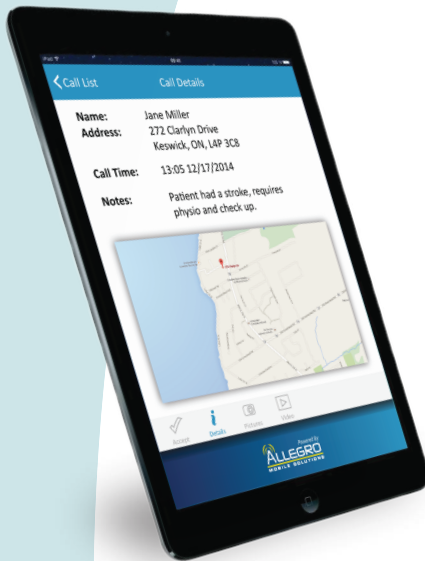

Managing the Workforce

By extending or even replacing the functionality of many dispatch and workforce management systems with Allegro's Health Care Modules, clients are able to bolster the overall efficiency of health care professionals by organizing patient times, planning routes and reporting on key work processes.

Key Points of Allegro software:
• Task management and patient scheduling
• Advanced security
• Voice messaging to nurses and doctors
• Geo-fencing and route optimization
• Service and task completion
• Patient identification and specimen tagging

Accessing Remote Knowledge

With Allegro's Health Care Modules, health care professionals are able to update and view patient history, manage inventory, and access various knowledge bases remotely.

Key Points of Allegro software:
• Electronic medical records
• Equipment and inventory lookup
• Photo and video capture
• Patient information and lab results
• Emergency preparedness and procedures

Improving Patient Experience

Providing health care professionals with immediate access to patient records at the time of need allows for more hands on time with patients and other caregivers.

Key Points of Allegro software:
• Assisted diagnostics and symptomatology
• Proof of service
• Dispensing and supplies ordering
• Forms and waiver acceptance
• Public outreach and education
• Reports and compliance

" **Many firms can provide these services, but few do so with the professional integrity demonstrated by the people at Allegro. Never satisfied with simply delivering technology, Allegro's continual focus is on delivering software solutions that address the core business objectives associated with improving client care.** "

HOSTING & SUPPORT

Allegro's software offerings are available on a licensed or Solution-as-a-Service basis and can be hosted in the cloud, at our data center or installed at your office. Allegro offers a full portfolio of managed services to assist clients with the remote monitoring and management of their applications, end-user devices and WLAN mobile infrastructure.

About Allegro

With headquarters in Toronto, and offices in Montreal, Dallas and Rome, Allegro Mobile Solutions has earned a reputation as the leader in providing mobile solutions as a service. Allegro is certified in both ISO 9001 and ISO 14001.
