**ALLEGRO**
MOBILE SOLUTIONS

The Wireless Engineers and Mobility Experts within the Allegro Mobile Solutions professional services team assist clients with designing, implementing, and securing standard and complex WLAN implementations.

Mobile Infrastructure

Our experts hold a variety of industry and vendor certifications in wireless security, wireless network architecture, configuration and network administration. The following architecture diagram highlights many of the interconnected components and integration points seen within large WLAN implementations.

As a trusted advisor and support organization, Allegro's comprehensive portfolio of services include:

✓ Wireless strategy, planning, modelling and simulation
✓ Wireless security and PCI compliance
✓ Integrated LAN, WAN and WLAN site survey, architecture and design
✓ Wireless diagnostics, remediation and optimization
✓ Project management and end-user change management

Allegro provides standard and complex implementation and configuration of:

✓ 802.11 Wireless LAN (WLAN)
✓ Mesh networks (Mesh)
✓ Machine-to-machine connections (M2M)
✓ Point-to-point communications (P2P)
✓ Wireless security, compliance and device management software

✓ Real-Time Locationing Systems (RTLS)
✓ Cabling, Switches and Access Points (APs)
✓ Wireless Intrusion Prevention systems (WIPS)
✓ Centralized WLAN management systems

Custom Development

The Allegro Mobile Solutions professional services team offers a range of custom application development and custom application integration services for clients who need additional specialty applications and integrations not offered as part of the Allegro Mobility Platform software suite of applications.

Managed Services

Allegro offers a range of on-demand and outsourced managed services to help clients actively monitor, manage and support their wireless networks, wireless security, mobile applications and end-user devices.

• Hosting and application management services
• Wireless network administration, remote monitoring and management
• Mobile device management
• Device staging, kitting and break-fix repair services

A full range of Mobile Software, Infrastructure and Services

Allegro Mobile Solutions is an international mobile solution provider offering mid-market, enterprise and public-sector customers end-to-end mobile strategy, design, configuration, implementation & support services based on a full range of Mobile Software, Mobile Infrastructure and Professional Services.

Mobile Vision and Strategy

Software
(Software and Industry Solutions)

Industry Software Suites
• Field Services
• Transportation and Logistics
• Retail Management
• Government and Healthcare
• User productivity modules

Mobile Thought Leadership
• Mobile vision and strategy
• Software selection
• Business process reengineering
• Wireless security
• Change Management

Infrastructure
(Infrastructure and User Devices)

Complex WLAN Infrastructures
• Controllers and access points
• Mesh routers and switches
• Devices, infrastructure & security

End-User Devices
• Hand-held devices
• Peripherals - scan, swipe & print
• Tablets, kiosks and digital signage

Best of Breed Vendors
• Devices, infrastructure & security

Services
(Mobility Experts and Support)

Mobile Infrastructure
• Strategy, architecture & design
• Security & compliance
• Large WLAN implementations

Custom Development
• App development & integration

Managed Services
• Monitoring and troubleshooting
• Cloud-based hosting and support
• Staging, kitting and device repair

Allegro Mobility Platform (MDAP / MEAP - Mobility Enterprise Application Platform)
• SOA architecture for Plug & Play app configuration
• Core application, integration and security engines
• AMP-RS – real time device management suite
• Native or Hybrid Apps (Windows, Apple iOS & Android)
• Cloud-based, hosted or client-server
• Ongoing monitoring, application maintenance and support

About Allegro

With headquarters in Toronto, and offices in Montreal, Dallas, Italy and China, Allegro Mobile Solutions has earned a reputation as a leader in providing end-to-end mobile solutions; distinguishing itself from its competitors by providing enterprise mobility consulting services, software development, infrastructure, and hardware implementations, each underpinned with a depth in technical expertise and know-how. Allegro's full spectrum of software, infrastructure, and services give clients a single point of contact for their enterprise mobility needs. In 2009 Allegro was named Canada's fastest growing company by Profit Magazine. In 2012 Allegro attained both ISO 9001-2008 and ISO 14001 certifications.
